CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you can confirm the sender and know the content is safe.

PS: Figure 6 shows a swimming pool however it is not listed or noted in the Project Description or mentioned anywhere in the IS/MND document, can you please explain it's absence and/or confirm if this is a feature that is being considered?

Thank you.

Dear Mr. Morrissey,

A Project Notice for the "Eco Dome Project - PROJ-2022-00119" requested public comments to be submitted to you by September 16, 2022, we would like to make a formal request for a copy of all comments submitted for public review by our community group. Can you please advise if an email request is sufficient if not please let me know if there is a standard LUS procedure to obtain the comments.

In reviewing the IS/MND it states "temporary sleeping domes," can you please provide what LUS defines as "temporary?" Likewise, is this project utilizing the "Campground" allowable use option under the RL zone; I do not see mention of Campground in any of the summary pages or descriptions however the verbiage is used throughout the report.

While we may have more inquiries before submitting comments by the Nov 1 deadline we thank you in advance for your prompt response on the above so we are given adequate time to formulate a response.

Warm regards.

Sincerely,
Justin Merino on behalf of the
